Hi, All.

I'm not sure who is on the ARSG mailing list and who isn't, so I'm sorry for any duplications.

Cynthia

Subject: Sept. ARSG Agenda

Dear Stakeholders:

Attached is an agenda for our Sept. 23 afternoon ARSG meeting and another draft Timeline. Below is a description of the evening Availability Session from EPA.

Both the ARSG meeting and the Availability Session will be in Town Hall.

Hope to see you there. Should be beautiful fall colors.

Peter Butler

970-259-0986

An Open House Availability Session regarding water quality and related issues in the Upper Animas River Watershed will be held on **Tuesday, Sept. 23, 2014**, from **6:30 to 8 p.m.** at the **Silverton Town Hall, 1360 Green St., Silverton, Colo.**

Rob Runkel, a U.S. Geological Survey hydrologist, will provide information about the current results of the One-Dimensional Transport with Equilibrium Chemistry (OTEQ) Model, which is being used by federal and state agencies to characterize the fate and transport of selected contaminants in the Animas River and its tributaries.

In addition, representatives from the U.S. Environmental Protection Agency, U.S. Bureau of Land Management, and the Colorado Department of Public Health and Environment will be available to talk one-on-one about their recent sampling events and planned activities in the Upper Animas River Watershed. Representatives from the Animas River Stakeholders Group also will be available to answer questions related to

their projects and planned activities.

This will be an informal discussion and participants can drop in any time during the session. Refreshments will be served.

In addition, EPA has been invited to make a short presentation to the La Plata Board of County Commissioners on **Wednesday, Sept. 24, at 6:30 p.m.** in the **Anasazi Room, La Plata County Courthouse, 1060 E. 2nd Avenue, Durango, Colo.** The commission has asked for an overview of what EPA knows about water quality in the Animas River, current source control efforts and the long-term investigation/remediation process.
